

Financial institution accelerated SSO

Challenge

Quickly deploy a cloud-based Identity and Access Management solution leveraging corporate Active Directory.

Solution

Single sign-on and federation.
Application and SaaS integration.

Result

4000 employees stored in Active Directory federated to the cloud.
SSO across multiple SaaS applications.

Technology

PingOne.
PingFederate.

“We couldn’t have executed as rapidly and as cost effectively without ProofID’s expertise.”

VP of Information Technology,
Mountain America Credit Union

The challenge

Provide an integrated workforce experience across multiple Software as a Service (SaaS) applications, without disrupting existing IT projects or adding IT resources. That was the problem facing Mountain America Credit Union (MACU) headquartered just outside Salt Lake City, Utah. Servicing over 4,000 employees and 448,000 members across the Intermountain West, MACU operates 76 branches plus branch services through online and mobile banking. MACU chose PingOne from Ping Identity based on their SSO and federation requirements. While PingOne provided a rapid, turnkey solution for onboarding SaaS applications, MACU’s IT organisation was at full capacity and without the necessary SSO and federation expertise.

The solution

ProofID, a Ping Identity certified integration partner, was chosen for their deep SSO and federation expertise as well as in depth knowledge of many of today’s leading SaaS applications. MACU’s VP of Information Technology said, “ProofID brought the best value based upon the experience of the team, their ability to predictably deliver, and above all their relationship and certification by Ping Identity.”

The result

With just 40 hours of professional service, ProofID managed the entire project, including coordination across different vendors, to successfully deploy SSO for SaaS applications for over 4,000 employees. The solution included integration of PingFederate with MACU’s on-premise Active Directory, bridging to PingOne. ProofID then managed the communication and coordination with Workday and Kaltura to configure, deploy and test each connection. “We couldn’t have executed as rapidly and as cost effectively without ProofID’s expertise. We established a fixed price and schedule and they met it,” said MACU’s VP of IT.

About Ping Identity

Ping Identity believes secure professional and personal identities underlie human progress in a connected world. Our identity and access management platform gives enterprise customers and employees one-click access to any application from any device. Over 1,200 companies, including half of the Fortune 100, rely on our award-winning products to make the digital world a better experience for hundreds of millions of people. For more information, dial U.S. toll-free 877 898 2905 or +1 303 468 2882, email sales@pingidentity.com or visit pingidentity.com.

About ProofID

ProofID is a IAM Managed Service Provider (MSP) operating globally. Our team of identity experts are trusted by many Tier-1 enterprises to design, deliver and manage their IAM services. We manage millions of identities and deliver services to over 150 countries. All successfully delivered through our methodology driven IAM Managed Service. For more information: email info@ProofID.com or visit ProofID.com.
